# CASAVIR JEWELRY

---

This printout is provided to help you get a feel for the ring widths that Casavir offers. The bars shown below are meant to be cutout and wrapped around your finger; they are labeled from 10 millimeters to 3 millimeters.

When printing this page, it is important to double check that your printing settings are set to 8.5 X 11 inch paper, and that "page scaling" is turned off or set to "none". With most PDF readers, these settings can be changed in the "print settings" box that pops up after pressing the print button. If you are printing this page from a browser, make sure that "fit to page" is unchecked.

For accurate results, please cut along the outside of the line.

\*These cutouts will not aid you in determining your ring size - they are only intended to help you choose the width of your ring.
